

Ashland "Green" Connection

Environmentally driven for maximum performance

Your one-stop shop for enhancing production while minimizing environmental impact, Ashland Distribution has joined forces with leaders in Resin Transfer Molding (RTM), Lite Resin Transfer Molding (LRTM) and Vacuum Assisted Resin Transfer Molding (VARTM) to offer you the products, technology and training to maximize your "green" performance advantage.

VARTM Materials and Technology Partner

SR Composites, LLC

- Reusable Sprayomer* vacuum bags for consistent infusion, having high puncture and tear strength, excellent chemical resistance and many features that eliminate process waste.

Product Partners

Ashland's ENVIREZ® resin

- A bio-based resin system using renewable resources for open and closed molding applications.

US Polychem's ACRASTRIP* composite resin remover

- This non-flammable, HAP-free, 100% replacement for acetone is the only DfE Division of U.S. EPA-endorsed cleaning solvent for thermoset resin systems.

RTM/LRTM Service Partners

JHM Technologies

- Specializing in LRTM training schools, RTM equipment, molds and consulting

New Boston RTM

- Specializing in RTM tooling and production

Offering the products, the processes and the technology you need to

- Improve productivity
- Reduce VOC/HAP emissions
- Reduce waste
- Promote environmental benefits
