Subject: Ashland position on Unique Formula Identifier (UFI)

Dear valued customer,

Thank you for your inquiry regarding Unique Formula Identifier (UFI) required for identification of specific mixtures which have been notified to ECHA under Annex VIII of CLP, Harmonized Poison Center Notifications.

Annex VIII sets obligation to submit harmonized information relating to emergency health responses to relevant Authorities by companies placing hazardous mixtures on the EU market.

Ashland has obtained UFI for consumer, professional and industrial use mixtures in relevant countries. They can be found in respective SDSes in section 1.

Please be informed that some products do not require to be notified for not being hazardous (no health nor physical hazards) and therefore will not have a UFI assigned by Ashland.

We realize that you may need our UFI to be able to complete your submission in so called Mixture-in-Mixture (MIM) scenario. Please be assured that Ashland is continually striving to maintain the highest standards in the services and products they supply. We hope this information proves helpful, and if Ashland can be of any further assistance when it comes to request for specific hazardous products UFI numbers, or any other requests, please contact your Ashland customer service representative.

Kind regards,

A handwritten signature in dark ink, appearing to read "Tim McArragher", written in a cursive style.
