rad-sure™ UVA 3J
UVA illumination indicators

description
Expanding upon the great functionality and reliability of Rad-Sure™ Irradiation Indicators, Rad-Sure UVA 3J extends the benefit of the “NOT” to the Cerus INTERCEPT® Pathogen Reduction System for Platelets and Plasma. Rad-Sure UVA 3J features a unique multi-window design that is specifically calibrated for UVA light. The exposed indicator windows can then transfer from the illumination container to the final storage containers, following the path of the product.

*Third party owned trademark.

benefits
- not subjective – know that the product has been properly illuminated when the film turns black and the “NOT” is completely obscured
- transfers with the product – Rad-Sure UVA 3J features a three-window design that peels and transfers to the storage containers after illumination
- color-blind friendly – no need to match colors, just read the indicator to know the blood product has been illuminated
- ISBT-128 2D bar-code
