The information contained in this brochure and the various products described are intended for use only by persons having technical skill and at their own discretion and risk after they have performed necessary technical investigations, tests and evaluations of the products and their uses. Certain end uses of these products may be regulated pursuant to rules or regulations governing medical devices, drug uses, or pesticidal or antimicrobial uses. It is the end user's responsibility to determine the applicability of such regulations to its products.

All statements, information, and data presented herein are believed to be accurate and reliable, but are not to be taken as a guarantee of fitness for a particular purpose, or representation, express or implied, for which seller assumes legal responsibility. No freedom to use any patent owned by Ashland, its subsidiaries, or its suppliers is to be inferred.

Disclaimer: Notice: All precautionary labels and notices should be fully read and understood by all supervisory personnel and employees before using. For additional safety and health information, contact Ashland. Purchaser has the responsibility for determining any applicability of a compliance with federal, state or local laws and/or regulations involving use, particularly in making consumer products.

The information contained herein is correct to the best of our knowledge. The recommendations or suggestions contained in this bulletin are made without guarantee or representation as to results. We suggest that you evaluate these recommendations and suggestions in your own laboratory prior to use. Our responsibility for claims arising from breach of warranty, negligence, or otherwise is limited to the purchase price of the material. Freedom to use any patent owned by Ashland or others is not to be inferred from any statement contained herein.

Air pollution control - cement kilns

 **Ashland**<sup>™</sup>  
always solving

Derakane™ epoxy vinyl ester resins are used in air pollution scrubbers for cement kiln operations.

### Ductwork

Ductwork made from Derakane 510C-350 resin offers superior corrosion resistance. The Ductwork can also withstand temperature excursions up to 315°C (600°F). They are lightweight and do not require insulation.

### Chimney

Constructed with Derakane 510C-350 resin, FRP chimneys are considerably less expensive than C-276 clad steel.

### Tanks and Piping

Tanks and piping made from Derakane 411-350 resin offer excellent abrasion resistance. FRP slurry tanks are much lighter than metal and are less expensive than rubber-lined steel.

### Scrubbers

Shells and internals in the scrubber are made from Derakane 411-350 resin and Derakane 510C-350 resin. Ashland resins have superior corrosion resistance and excellent abrasion resistance. Scrubbing equipment made from these resins requires less maintenance than acid brick or rubber lining, and is much less expensive than C-276 clad steel.
